Abstract:
Currently there are very many number of people who need jobs. Here the role of recruitment companies with companies that need workers. The programs are distributed to the company's workforce - the company relationship, the candidates who want to enroll are required to fill the biodata. Furthermore, these companies provide recommendations to prospective workers to take the test at companies that need workers. On the application of labor supply there are four writers create the form. On the main form there are forms of labor candidate registration form, the form relations firm to find companies which require labor, the form of manpower to register candidates for employment who has been accepted in corporate relations. To the officers who run these applications should be able to operate a computer and also have to master Visual Basic. So also for the development of this application program leadership should prepare all the supporting facilities and infrastructure. Corporate leaders can make the relationship between corporate relations more broadly.
