Advisors: Elly Agustina

Keywords: Expert System, Skin Treatment, Visual Basic 6.0

Page: (x + 52 + Annex)

Many of the problems experienced by the community, especially the problem of disease and, more particularly the problem of skin diseases. The problem is especially needed an expert / expert in that field. Time, money, and laziness of people to call an expert in addressing the issue. Therefore, the authors make an application of traditional medicine, and the more specific issues regarding skin problems because the skin is a minor problem that society / people reluctant to seek expert skin. Applications that used to use Visual Basic 6.0, the reason being that the resulting capacity is not too large, and because it greatly simplifies the visual shape of the user.
