Keywords: Inventory

Page: (XIII + 43 + Annex)

Scientific writing contains a simple program on the computerized inventory, using the input purchasing goods through the transaction, which will then automatically stored in a database and will exit the display output to be received by the customer or purchaser as the invoice or receipt and viewing reports required by the company. Scientific Writing is supported by Microsoft Access 2003 Programming Language through the process of inputting and sales of computerized this makes data processing more efficient and accurate and can provide information on existing inventory.
